2	Stres	s Distribution in a Linearly Elastic Half-Space	7
	2.1	Analysis of Stress	9
	2.1.1	Definition of Stress	9
	2.1.2	Geotechnical Sign Convention	12
	2.1.3	The Importance of a Consistent Sign Convention	12
	2.1.4	Coordinate Transformations in Two Dimensions	13
	2.1.5	Three-Dimensional Stress	17
	2.1.6	Equilibrium	20
	2.1.7	Cylindrical Coordinates	21
	2.2	Analysis of Strain	22
	2.2.1	Definition of Infinitesimal Strain	22
	2.2.2	Compatibility of Strains	25
	2.2.3	Cylindrical Coordinates	26
	2.3	Elastic Constants	27
	2.4	Solutions of Problems in Linear Elasticity	30
	2.4.1	The Boussinesq and Cerruti Solutions	31
	2.4.2	Uniform Vertical Loading on an Infinite Strip	35
	2.4.3	Linearly Varying Load on an Infinite Strip	35
	2.4.4	Triangular Vertical Load on an Infinite Strip	36
	2.4.5	Embankment Loads	37
	2.4.6	Uniform Vertical Load on a Circular Area	39
	2.4.7	Other Surface Loadings	39
	2.5	The Computer Program STRESS	40
	2.5.1	The Menu Structure in STRESS	40
	2.5.2	The First or Main Menu	41
	2.5.3	The Load Type Menu — Rectangular Loads	42
	2.5.4	The Load Type Menu — Circular Loads	43
	2.5.5	The Load Type Menu — Infinite Strip Loads	43
	2.5.6	The Load Type Menu — Half the Infinite Surface	45
